

TSU Protect

Short Company Profile

TSU Protect is a subsidiary of TSU Group Holdings (Pty) Ltd., the holding company for the TSU group of companies headquartered in South Africa.

TSU Protect (Pty) Ltd. was incorporated in 2014 and shortly afterwards started to work on the development of the TSU Protect Mobile Safety and Security App. Initially used primarily within the TSU group of companies to provide back-up support to security officers and management in the field, the need was soon identified to roll the TSU Protect App service out to TSU clients and finally making it available for the general public.

Today our service and product offerings have grown to include Smart Gate and Reception Access Control Solutions, IoT and GPS Asset Tracking Solutions and high-level Security Risk Consulting Services including personal, residential and commercial security risk assessments.

TSU Protect specialize in security solutions for private individuals as well as corporations in various industries. The TSU Protect App is now in South Africa, Namibia and Nigeria. Soon it will be available in several other African countries as well. Our secure and intelligent Smart Gate Control system making use of 2D scanning technology replace the old paper access control registers completely and add additional layers of security including the scanning of barcodes and seals and taking images. Using the latest IoT technology, our tracking solutions can be used alone or in conjunction with other tracking applications.

- **TSU Protect Mobile Safety and Security App**

The App turns any smartphone into a panic button linked to a 24/7 monitoring centre and supported by a network of armed security and emergency medical responders. With its Tracking, Meeting, Man-Down, Geofence, Journey and Report functions the TSU Protect App can be used as a complete personnel and personal security management tool.

- **Smart Gate Control Solutions**

Replace your old and outdated paper-based access control registers with our Smart Gate Control Solution using 2D Scanners to scan vehicle licence disks, drivers' licences, ID Card's or any other barcode.

- **Smart Reception Solution**

Our Reception Solution with iPad and visitor sticker printer is a visitor management portal which automates and streamlines much of the reception function.

- **Asset Tracking**

Our IoT and GPS tracking solutions requires no installation and can be hidden in any asset by the client in total secrecy. Monitoring is done by the client via a web dashboard and a mobile phone App. TSU Protect will take care of all the required device and back-end settings. Recovery of stolen/missing assets are done via our sister companies TSU Protection Services, TSU International and AM Security Services.

- **Security Risk Consulting**

TSU Protect works closely with clients to improve and sustain wide-ranging and high-performance security and risk management strategies that are cost effective, mitigate risks and advance business and mission objectives. We draw on the expertise and experience of a core of senior managers within the TSU group of companies and where necessary, approved external specialists are also engaged.
